

## OBJECTIVES

- Discuss assessment and treatments of pediatric disease, injury and how to protect, maintain and promote the health of individuals, families, and community.
- Apply appropriate diagnostic and technical procedures, to analyze and interpret findings to define the nature of a problem with a child exhibiting learning, developmental, or behavioral difficulties.
- Exercise clinical judgment to establish appropriate therapies with a child diagnosed with diabetes and asthma.
- Discuss the management of patients including health promotion and disease prevention of diabetes and asthma in an effective, efficient and ethical manner.
- Discuss current medication treatment specific to the pediatric population.
- Examine successful techniques to promote health and prevent disease among the latino immigrants in Alabama.
