

OBJECTIVES

At the end of this activity, participants will be able:

- To describe the basic elements of the current standard for the evaluation for ADHD
- To identify the basic standards of available treatment including the risks and benefits of pharmacotherapy of child and adolescent ADHD
- To discuss systems of care issues for patients with schizophrenia
- To examine treatment that will enhance recovery for patients with schizophrenia
- To describe the history, epidemiology and diagnostic issues related to post traumatic stress disorders
- To explain the different treatment modalities and how resilience plays a role in the prevention of PTSD
- To describe the importance of recognizing the presence of personality disorders
- To identify ways to distinguish one personality disorder from another
- To discuss pharmacological and non-pharmacological management of behavioral problems in dementia
- To examine the recognition and treatment of delirium in patients with dementia
- To describe the diagnosis and classification of Bipolar Affective Disorder
- To discuss updated bipolar treatment regimens
- To review the epidemiology, DSM-IVTR criteria and clinical presentation of anxiety disorders
- To summarize results of studies with various classes of anti-anxiety medications and compare medications, CBT and other therapies
