

OBJECTIVES

At the end of this activity, participants will be able:

- Discuss the management of the patient with peripheral vascular disease including AV grafts and fistulas.
- Identify strategies for caring for the patient with end-stage renal disease.
- Review aortic disease clinical findings, screening, referral guidelines and interventional strategies.
- Explain carotid artery disease, diagnosis, current interventional techniques; including stenting and follow up care.
- Describe approaches for diagnosis and treatment of vascular conditions related to venous insufficiency.
- Analyze pharmacological management of the patient with vascular disease.
